8. Administration & Season Management

Administration

- Management page to manage the federations and clubs
- Integrate with invoicing tool per federation for our invoices (billing). Calculations and PDF generation on our side?
    - Payt (NL)
    - Stripe (maybe other countries)
- Modules overview
- Systemplans with moduleaccess and pricing, also setup fee and price per x-monthts (yearly, monthly, per member...)
- Reporting per systemplan
- Automated self-onboarding new clubs
- Import tools for support to import extra data if needed

Seasons

Key Uses of Seasons in a Sports Club SaaS Platform

1. **Competition & League Management**
    - Define **start and end dates** for leagues or tournaments.
    - Track **team standings and results** throughout the season.
2. **Membership & Registration**
    - Manage **player registrations** for each season.
    - Automate **membership renewals** based on seasonal timelines.
3. **Scheduling & Event Planning**
    - Set up **training schedules** and match calendars.
    - Organize **seasonal events** like tryouts or awards ceremonies.
4. **Financial & Billing Management**

- Adjust **subscription fees** or club dues per season.
- Track **expenses and revenue** tied to seasonal operations.

Using seasons ensures smooth transitions between different phases of the club's activities, keeping everything structured and efficient.

- On highest level (Federation) there will be seasons, see it as a period with a name, startdate, enddate and referencedate (nullable)
- All clubs will get auto-generated seasons linked to the main federationseason
- Club can manage their own seasons and create subperiods within a parent season
    - 2024-2025 (01-07-2024 – 30-06-2025)
        - Extra period: 01-07-2024 – 15-08-2025
        - Indoorperiod: 15-11-2024 – 02-03-2025)
        - ....
- Parent seasons can't overlap, subperiods can overlap
